

## **Directions:**

### **For PC**

- Slip your mouse on the button "Download", then select the resolution that suits you. The picture will open in a second window.
- Right-click on the picture with your mouse. Then select "Choose the picture as wallpaper".
- You can also record the wallpaper by right-clicking on the picture and selecting "Save as".
- You then only have to open the Control panel and select "Appearance and Themes", then "Display".
- Under the "Desktop" tab, click on the button "Browse" in order to find the recorded picture. Then press "Ok".
